MUBEEN KHALID Software Engineer | Lahore **Email**: mubeenkhalid1110@gmail.com

Cell: (+92) 322-0636637 **LinkedIn**: MubeenKhalid10 **GitHub**: MubeenKhalid

INTRODUCTION

I am a Software Engineer with hands-on experience building AI-powered and backend-driven applications using Python, FastAPI, and Next.js. Developed Retrieval-Augmented Generation (RAG) systems, semantic search workflows, and scalable APIs for document querying and intelligent automation. Interested in applied AI engineering, backend systems, and enterprise software development.

EDUCATION

COMSATS University Islamabad, Lahore Campus
Bachelor of Science in Software Engineering 2022 – 2026
Punjab Group of Colleges
FSC (Pre-Engineering) 2020 – 2022

EXPERIENCE

Hashmaker Solutions –*AI Associate Engineer* (August 2026- Present)

- Developing AI-powered and data-driven applications while gaining hands-on experience in Python, PostgreSQL, LLMs, RAG, real-time voice AI, API integration, and backend development.
- Collaborated on production-oriented software projects, focusing on automation, scalable data processing, AI integration, and building practical solutions for business use cases.

PROJECTS

LeadFlow (Lead Data Cleaning and Sorting)
Internship Project

- Developing a data cleaning and lead management platform using Python, Streamlit, and PostgreSQL for automated lead processing and database management.
- Implemented features including intelligent column mapping, data standardization, duplicate removal, country-based filtering, bounced email detection, master database validation, special-character handling, and persistent master data management.

AI Cold Call Agent
Internship Project

- Developing an AI-powered outbound cold-calling platform using Pipecat, Twilio, Deepgram, LLMs, Cartesia, PostgreSQL, and RAG for natural, real-time sales conversations.
- Implemented features including prospect and campaign management, intelligent lead qualification, objection handling, personalized conversations, meeting/callback workflows, call transcription, summaries, and CRM-ready call results.

SWIFTCARE (Healthcare Appointment & Queue Management Platform)
Final Year Project

- Developing a healthcare appointment and queue management platform using Next.js and backend APIs.
- Implemented features including real-time live queue tracking, online appointment booking, doctor/hospital management, secure JWT authentication, and project specific AI assistant for patient guidance, and role-based access control.

SKILLS

- **Frameworks & Tools** TensorFlow, SikitLearn, PyTorch, Flutter, Node.js, Next.js
- **AI and ML** RAG, LangChain, LLM Applications, Embedding Models, Vector Databases
- **Databases** MongoDB, SQL, Firebase, Supabase, Pinecone
- **Interests** Machine Learning, Artificial Intelligence, App Development

CERTIFICATIONS

- **Foundations of AI and Machine Learning —** Microsoft
- **AI and Machine Learning Algorithms and Techniques —** Microsoft
- **Python Full Course —** IBM
